

DeepSight Toolkit 6.6.0 release notes

What's new?

1. **DeepSight SDK 1.0.2** - running the latest age & gender models, excluding body detection;
2. **BroadSign Control integration** - combine BroadSign PoP data with the Toolkit audience data seamlessly. Learn more [here](#);
3. **FFmpeg to GStreamer** - better IP camera stream stability;
4. **IP camera reconnect** - new feature to reinforce IP camera stability;
5. **JSON machine state** - if the Toolkit is running, it will constantly send its state over the network;
6. **DirectShow for USB** - improve the USB camera startup time;
7. **Video loop analysis fix** - the Toolkit can now loop videos indefinitely;
8. **Image Position center button** - middle button now resets camera position;
9. **Timezone adjusted timestamp** in JSON and CSV aggregated output;
